ECS Requirement Verification by Analysis Report

Report No.:	0061	L3 Req ID:	SDPS0250
Current VDB Record			
CCR No.:	01-0951	CCR Date:	Jan 9 2002
Release:	5A Future	Category:	SDSRV, DDIST
Requirement Text:			
<p>For the first six months following the launch of AM-1, the ECS shall support the production of MOPITT/AM-1 standard products generation at the MOPITT SCF, and provide the archive and distribution of MOPITT products from the ECS. In support of this requirement ECS shall: a. provide MOPITT Level 0 data, ancillary data, MOPITT processing to MOPITT SCF b. archive Level 1 through Level 4 MOPITT science products produced at the MOPITT SCF c. provide previously archived MOPITT and ancillary data to MOPITT SCF for reprocessing (After L+6 months MOPITT science products will be produced, archived and distributed by the ECS.)</p>			
Clarification Text:			
<p>MOPITT does not use the SIPS machine to machine interface for reprocessing, because they are expected to do processing within ECS by then.</p>			
Verification Analysis:			
<p>ECS has met the requirement for providing products to the MOPITT SCF (by means of subscriptions) for processing and reprocessing and for archiving MOPITT data products through the SIPS interface. MOPITT processing has not been transferred into PDPS at the DAAC as originally planned but there is still a plan to transfer L1 processing. This can be done by the DAAC without any impact on the ECS.</p>

ECS Requirement Verification by Analysis Report

Report No.:	0068	L3 Req ID:	IMS-0130
Current VDB Record			
CCR No.:	99-0546	CCR Date:	Jun 30 1999
Release:	5B Partial	Category:	CLS, CSS
Requirement Text:			
The ECS shall verify that a user is authorized to access a particular ECS service before providing the service to the user.			
 Clarification Text:			
This includes users of external clients supported by ECS gateways. Current: Authorization only supported for DARs Future: L1B on demand production (5B) and restricted granules (5B)			
 Verification Analysis:			
This requirement is cited on and partially satisfied by ticket RM_5B_03, "On-Demand ASTER L1B and ECS-GDS Gateway".			
Although it is not cited on tickets RM_5B_10 (Restricted Granule Access) and RM_5B_11 (MSS User Profile Enhancements), they complete the requirement.

ECS Requirement Verification by Analysis Report

Report No.:	0069	L3 Req ID:	IMS-1075
Current VDB Record			
CCR No.:	99-0496	CCR Date:	Jun 7 1999
Release:	5A Future	Category:	CLS
Requirement Text:			
The ECS tool that provides users with the capability to construct and submit DARs shall be accessible from personal computers and workstations, without requiring users to install ECS client software.			
Clarification Text:			
Verification Analysis:			
Although this requirement is not cited in a ticket, ECS provides the web-based Java DAR Tool which can be accessed through web browsers that support Java. It utilizes JDK version 1.2, which is fully compatible across the required platforms. Upgrade to 1.3 is planned. Users do not have to install ECS client software.

Requirement Text:			
The ECS shall provide data order capabilities integrated with metadata search capabilities.			
Clarification Text:			
The Data Order capability is provided by Product Request.			
Verification Analysis:			
This requirement is satisfied by the Integrated Search and Order capability in the Machine-to-Machine Gateway.			
Integrated search and order is provided by the external EDG client, supported by the ECS V0 Gateway.
